(54) Title: **WIRELESS OPERATOR INTERFACE FOR MATERIAL APPLICATION SYSTEM**

(57) Abstract: Operator interface provides identification of one or more operational functions, each at an operational location, to an operator via an access device. The access device may have a wireless connectivity with the operational functions, and presents menus that are specific to the identified function. The access device optionally provides data, control functions, recipes, menus and so on to the operator. In this manner, an operator can exercise local control of the operational functions at different operational locations, thereby reducing lost time and energy transferring between the operational locations.

ZW), Eurasian (AM, AZ, BY, KG, KZ, MD, RU, TJ, TM), European (AT, BE, BG, CH, CY, CZ, DE, DK, EE, ES, FI, FR, GB, GR, HU, IE, IT, LU, MC, NL, PL, PT, RO, SE, SI, SK, TR), OAPI (BF, BJ, CF, CG, CI, CM, GA, GN, GQ, GW, ML, MR, NE, SN, TD, TG).
